Objective

To find a challenging computer systems/network management experience in an environment open to new ideas and new technology ready to benefit from cost saving implementations of multiple platform, application specific, need driven systems/network management synergy

Computer Hardware

Experienced with Dell servers and Tape libraries including administration of Backup Exec 10d
Successfully restored main file server containing over 650GB of data after complete raid crash
Implemented and administered computer training lab for clients and dealers of CLARK forklifts
Built and installed multi client Windows 2003 active directory servers with strong security policies
Designed secure Linux backup setup and web servers as well as Windows 2000/2003 web servers

Computer Software

BaaN ERP on HP-UX with Informix database back end user administration training
AS400 training in OS400 administration and database administration for AS400 systems
Successfully virtualized a SCO UNIX 5.0.5 system while live to remove it from dying hardware
Rewrote 6 year old scripts for IDEAS 11 cad system for printing to pdf format
Installed and configured Goodlink Mobile Email client and server for Executive's access on Treo's
Designed and created Knoppix based Linux Distribution in Russian <http://katyalix.sourceforge.net>
Setup apache web hosts, MySQL server/databases, and secure remote
access for web site servers and client administration connections
Setup Windows 2003 DNS servers and setup Linux Bind 9 DNS servers

Web Programming

Sharepoint Services 3.0 training and administration completed at New Horizons
Installed, configured, and administered new Layton Helpbox help desk system for CLARK
Administrator and designer of <http://computeusa.us> and <http://townstalk.com>
Member of the original design team for <http://www.kaht.net>

Computer Education and Training

Trained Clark Tech support personnel in BaaN ERP and iSeries Access setup for users
Founded Linux users group at ECU in 2001 (currently called Student Computing Association or SCA)
Presented Linux Workshops for ECU students on the installation Linux in 2001

Skills

Over 10 years of experience with computers while always learning new technology applications
Self motivated, friendly, reliable and a team player without the word "can't" in vocabulary
Ability to quickly solve problems and offer solutions that can save precious company time

Education

Eastern Kentucky University Richmond, KY
Major: Computer Electronics Technology
Graduated with Associates of Applied science in July of 2006
Currently seeking Bachelors in Computer Electronic Networking

Other skills

Currently learning Russian, knowledge of basic Spanish, and some German as well
