OBJECTIVE

Network Administrator, Computer Repair Technician

SUMMARY

- Currently enrolled in Computer Electronic Networking Program at Eastern Kentucky University with a 3.666 GPA in my major.
- Currently working on multiple certifications including A+, Network+, CCNA, and Security+.
- Hard-working, adaptable to different situations and needs, goal-oriented, and dedicated to the career. Fixing computers for over 10 years, excellent time management skills, punctual, and efficient, as well as thorough, when solving problems.

WORK HISTORY

Information Technology – Eastern Kentucky University, Richmond, KY

Computer Lab Associate, (2008 – Present)

Oversee certain Departmental Student Computer Labs, create computer images and fix any problems within Student Computer Labs across campus, solving compatibility issues within Vista and Windows XP

Information Technology - Eastern Kentucky University, Richmond, KY

Computer Lab Worker, (2006 – 2008)

Helped people with problems with Microsoft office, computers in general, flash drives, and printing issues. Job includes fixing printer problems and restocked printer paper and toner, re-arranging entire computer labs, upgrade old computers for Vista compatibility, set-up new computers for Vista and various troubleshooting issues. Set-up other computers around campus and prepared computers for terminal services.

Napalm Sammitch Productions, Holy Cross, KY

Website Designer, (2000 – 2006)

Designed and managed websites for different businesses, including Ekstrom Lawncare (Landscaping and Lawn Care business located in Hollis, New Hampshire) and Subdue Gaming (Electronic-Sports Gaming Syndicate located in Kentucky).

Self-Employed, Holy Cross, KY

Networking Technician and Computer Repair, (2000 – Present)

Configured and successfully managed various networks for many clients, including a Small Home Business which required different networking peripherals (modem, router, switches). Built 50+ computers and successfully repaired 200+ computers for the members of my community and neighboring communities. Upgraded many for compatibility with new software, fixed and/or replaced old problem causing hardware, and built many systems from scratch.
