

Color Management

Assignment #2

Each student is to create two ICC profiles, one for a computer monitor, and one for the Epson Stylus Photo 1400 printer. Two students may work together on the printer profile. If so, their assignments are to be submitted in the same folder.

Monitor ICC

Create a profile of a lab monitor using the X-Rite i1 Match software and spectrophotometer.

Laboratory Computer = Mac _____

Date monitor profile was created: _____

Printer ICC

Create a profile for the Epson Stylus Photo 1400 printer on glossy paper. This part of the assignment is to be completed using the Mac 14 computer. Name the profile with the student's names and the date, as in smith-young_2_11_10_1. Submit a print of the i1 CMYK 1.1 test chart and the color test target.

Evaluation	Points Possible	Points Received
1. Monitor Profile	10	_____
2. Printer Profile		
i1 CMYK Test Chart	5	_____
Color Test Target	5	_____
Profile Quality	5	_____
Total	25	_____
