

# CSS Setup

## Assignment #1

Students are to setup their 355 home page using XHTML and CSS. The page is to have the following specifications and be visible from the Technology Department's Student Web Pages directory.

### Specifications:

1. The page must be named default.html and titled with the student's name.
2. Create an external CSS file named 355.css.
3. In the external CSS file, create at least three different font styles using the class selectors of h1, h4 & h6. The h6 is to be used for paragraph text, the h4 for subheads and the h1 for headlines. The values of the font-family properties should first list either Verdana or Georgia, list last either sans-serif or serif and list between other appropriate fonts. Use em sizes.
4. Add text to the home page using each of the three font styles, including a paragraph placed in a CSS box using an ID selector from an internal style.
5. There is to be a photo of the student placed in a CSS box using an ID selector from an internal style.

| Evaluation                              | Points Possible | Points Received |
|---|-----------------|-----------------|
| 1. Home Page Name and Title             | 4               | _____           |
| 2. External CSS file with Font Styles   | 8               | _____           |
| 3. Fonts Used on Home Page: h1, h4 & h6 | 6               | _____           |
| 4. Text Box                             | 6               | _____           |
| 5. Student Photo in Box                 | 6               | _____           |
| <b>Total</b>                            | <b>30</b>       | _____           |
