

# CSS Setup

## Assignment #1

Students are to setup their 355 Web site using XHTML and CSS. Three pages are to be created and placed in the student's folder on the ECU Student Web Server. The student's 355 homepage is to be visible from the Technology Department's Student Web Pages directory.

### Specifications:

1. A file named default.html is to be placed in the root directory of the student's folder that will redirect the browser to the student's 355 homepage.
2. Create a folder named 355 in the root directory of the student's folder.
3. Create the homepage and place it in the 355 folder. It is to be named default.html and titled with the student's name. It is to be XHTML 1.0 Strict.
4. Create an external CSS file named 355.css and place it in the 355 folder.
5. In the external CSS file, create at least four typographic styles:  
h1 for page headers, h2 for headers, h3 for subheads and p for body text  
The values of the font-family properties should have at least three fonts. List either Verdana or Georgia first and either sans-serif or serif last. For each, use an appropriate font weight and em font size.
6. There is to be a photo of the student placed in a CSS box using an ID selector from an external style.
7. Add text to the home page using each of the four font styles, including a paragraph placed in a CSS box using an ID selector from an internal style.

Evaluation	Points Possible	Points Received
1. Redirect Web Page	5	_____
2. Home Page Name and Title	5	_____
3. External CSS file with Font Styles	5	_____
4. Fonts Used on Home Page: h1, h2, h3 & p	5	_____
