

# Motion Tween

## Assignment #3

Each student is to create an Animation using Adobe Flash. The animation is to include motion tweening. The animation is to be placed on its own page in the student's Web site.

The animation is to have the following specifications:

1. 350 pixels high by 500 pixels wide.
2. There are to be at least three images, with at least two of them being motion tweened.
  - a. An imported vector image.
  - b. A vector image created in Flash.
  - c. An imported raster image.
3. At least one motion tween is to use an option of: rotate, scale, skew, tint, alpha or brightness.
4. The animation is to play for 20 seconds.
5. The animation is to be auto play and auto loop.

Evaluation	Points Possible	Points Received
